## **Fruit Trees will be planted in Africa**

Because of you, these Fruit Trees will be given to a local family in Africa to help provide them with a sustainable source of nutrition and income. They will be grown in a nursery until they are big and strong enough to be planted in the ground. These Trees can home wildlife, prevent erosion and retain much needed water in the soil supporting surrounding growth. They also help the global environment by absorbing up to 1,000kg of carbon dioxide, at the same time as releasing life giving oxygen.
